January 2019

Hello Fellow BCA Members and Friends,

Happy and Healthy New Year! It's 2019 and this will be my last President's call for renewal of memberships and wishing everyone a great year ahead.

The BioCommunications Association is 89 years old this year, what an accomplishment! A group of like-minded people realized if they pooled their resources and shared their expertise that they would help others in their field and create a professional standard for Medical and Scientific Imaging. 89 years later we are still keeping that standard and trying not to fold to the "Good Enough" mentality. I know the BCA can still grow and survive as the experts in our communication fields. The BCA needs your help to do that. Our sister societies are experiencing the same lack of fresh blood as we are but if everyone would talk to one person and convince them that the BCA is a worthy group then the BCA will live on. I am asking that you renew your membership and continue this legacy.

The BCA continues to add to its available knowledge base through:

- Communications – adding to social media through WebEx, YouTube, Facebook and building resources for the website
- Conferences – balancing the BCA talent and outside experts in delivering educational opportunities at BIOCOMM
- EFFE – helping people apply for the BCA's grants and scholarships.
- Certification – working towards growing from Total Body Photography certification to more certifications in other specialties.

All of these areas NEED YOUR HELP! Please jump in and lend your knowledge. Make a simple YouTube video, write an article for the Newsletter or Journal, apply for a grant, help with certification or run for office! Please renew your membership and get involved!

Mark your calendars for June 18-22 for BIOCOMM 2019 to be held at historic Asilomar in Pacific Grove, California. The meeting is shaping up to be a good one. Hope to see you there!

Sincerely,

Susanne Loomis, FBCA
President
